ENOCH OLASINDE

Web Developer +2347025518469

EDUCATION

B.sc Computer Science, Landmark University

PROFILE

I have spent the past 4-6years refining my skills and developing my career in the field of web development. I started out with django, picked up reactJS and NextJS along the way, and the journey thus far has been impressive. I really enjoy learning new things and this has really helped improve my flexibility. Also recently started blockchain development with web3 and writing smart contracts. In my spare time I work on graphics programming with C++, Javascript via openGL and webGL respectively. .
